- 300 ppi E Ink Carta™ display for pin-sharp typeface
- 8 GB storage for 6000 favorite books
- Nonstop reading with a battery duration of several weeks

## More than just good looks

The new design of the tolino shine 3 combines aesthetics with functionality. However, even though it is much smaller and even more compact, the eBook Reader still provides the same sized reading surface as its predecessor with a 6" display. Better handling is guaranteed thanks to both the new format and the structure of the non-slip surface on the back. The latter will give you a good grip on the eBook Reader, making long reading sessions effortless. The simplified interface pools all of the device's functions clearly in the menu of the tolino shine 3 for the first time – you can now also operate the reading light and start page navigation intuitively by swiping.

And the freedom to read is also as convenient as ever with tolino: you decide when and where to buy your eBooks. In the online shops of tolino bookstores, you can now browse through more than 2 million eBooks around the clock and download your favorite new books straight to your device.

## eBooks direkt downloaden per WLAN

Connect your tolino shine 2 HD to the Internet via WLAN and you're ready to shop! You can easily download hotly anticipated new releases, outstanding bestsellers or current eBook bargains to your tolino eBook Reader and start reading — in seconds and around the clock. Thanks to the integrated eBook shop you'll never run out of reading material. Free use of Deutsche Telekom AG HotSpots across Germany gives you fast access to the Internet and new reading material even with your mobile device.

## Optimal reading light at all times

The tolino shine 3 lets every story appear in a favorable light – day and night. The tolino smartLight provides optimal reading light on the tolino eBook Reader at every time of day or night. The color temperature in the integrated light automatically adjusts to suit the time of day and changes in harmony with the natural daylight, from cool white light in the morning to warm white light in the evening. This makes it perfect for your biorhythm – especially if you like to read before bed. Of course, you can also adjust the smartLight to your individual preferences or the ambient light: choose between a cool or warm light on your eBook Reader. In addition, the high-contrast, high-definition 300 ppi E Ink Carta Display offers an eye-friendly reading experience that's just like paper.

## High-performing battery for weeks of reading pleasure

Even heavy readers will be inspired by its stamina: the tolino shine 3 consumes little power during reading, guaranteeing weeks of reading pleasure without any need for charging cables. This is not just practical in everyday life, but also makes the tolino shine 3 eBook Reader an ideal travel companion.

## Extra-large memory for your eBooks

Saving space is so yesterday: from now on, your digital library will be able to continue to grow in leaps and bounds. With a generous 8 GB of memory, around 6 GB of it for your books, you can save up to 6,000 eBooks locally on your tolino shine 3. This means that you will always have your favorite books in your pocket, with the right book on hand at all times when you're on the go.

## Limitless freedom – buy eBooks wherever you want

tolino believes in openness and lets you choose for yourself which booksellers you want to buy from. This customerfriendly approach means you enjoy access to the full range of offerings from all available tolino eBook sellers. You can comfortably load existing ePUB and PDF eBooks onto your tolino shine 3 HD and read them there — tolino makes this especially straightforward with its tolino Cloud synchronization and the tolino library link. Digital reading – simple, practical and versatile with tolino.
